EDUCATION — JEROME FISHER M&T PROGRAM

- **The Wharton School, BS in Economics — Finance & Entrepreneurship** GPA: 3.9
 - **Relevant Coursework:** Corporate Finance, Accounting, Valuations, Managerial Economics, Leadership Management, Interpersonal Influence
- **University of Pennsylvania, BSE — Computer Engineering** GPA: 3.7
 - **Relevant Coursework:** Discrete Math, Data Structures & Algorithms, Advanced Dynamic Programming, Calculus I-IV, Linear Algebra, Probability & Statistics, Operating Systems & Hardware Design

EXPERIENCES

- **Clado AI, Head of Product** Aug 2025 - Present
 - Owned roadmap for enterprise AI search platform “Atlas” end-to-end (PRDs, OKRs, user interviews, prioritization, design reviews, analytics)
 - Launched Atlas and scaled usage to 100K+ total uses; instrumented analytics with PostHog, SQL, Grafana, and Pylon to drive iteration
 - Deployed a Dspy-informed retrieval/re-ranking approach improving OpenSearch relevance by 45% vs. baseline
- **Jaimy.ai, Founder** Nov 2024 - Jul 2025
 - Led 0→1 product from discovery to launch: interviewed users, scoped MVP, shipped an AI relationship-intelligence platform to early customers.
 - Designed GTM experiments and prioritized backlog using RICE; iterated onboarding, search, and insights workflows with eng/design partners.
 - Acqui-hired by Clado (Jul 2025); transitioned product/IP and joined Clado as Head of Product.
- **University of Pennsylvania, Teaching Assistant** Jan 2023 - Aug 2024
 - Led and managed product planning and physical prototype development for M&TSI, a high school program, guiding students through the entire project lifecycle.
 - Mentored and advised 3 teams on software engineering best practices and project execution for their CIS 3500 final projects
 - Designed and delivered project-based labs with a strong hardware focus for ESE 1120, Electricity & Magnetism
- **Shades.news, Software Engineer** May 2024 - Aug 2024
 - Shipped a dashboard feature with 70% CTR, contributing to increased session length and repeat usage
 - Implemented data pipelines and analytics to inform content surfacing and feature prioritization
- **DataGrade, Software Engineer** Jun 2023 - May 2024
 - Re-architected data and gen-AI endpoints on PostgreSQL with graph features, improving query latency and reliability over previous no-code stack
 - Migrated workflows off Airtable, reducing integration friction and operational incidents

EXTRACURRICULAR ACTIVITIES

- **Penn ARC W3ABT, President**
 - Relaunched the Penn Amateur Radio Club post-COVID, raising \$100K+ from alumni and engineering associations
 - Organized alumni-faculty-student luncheons and community events, growing membership by 3x and supporting 20+ new licensed operators
 - Oversaw club operations, led hands-on RF/electronics workshops, and shipped multiple antenna and hardware projects
- **Penn Labs, iOS Project Lead**
 - Built and maintained the analytics engine for PennMobile (10K+ users), enabling data-driven product decisions and roadmap planning
 - Led team to develop LabsAnalytics, a high-performance async analytics service for PennMobile iOS/macOS
 - Managed and launched “Penn Wrapped,” a feature to drive user engagement and retention
- **M&T Innovation Fund, Fund Manager**
 - Sourced and consulted for technical Penn startups, managing grants up to \$10,000 and developing new fund strategies

COMPETITIONS & HACKATHONS

- **Consensus Hackathon 2024**
 - Won \$10,000 in prizes and a \$50,000 grant for a decentralized finance platform, Lens, on the Rootstock network
- **Craft Ventures HackAthon 2024**
 - Won \$5,000 by building an AI agent for calendar management, achieving top 5 among 2000+ applicants
- **VeChain x EasyA Hackathon 2023**
 - Won \$1200 in prizes and \$30,000 in funding for a VeChain based dApp promoting sustainable travel
- **Carnegie Mellon picoCTF 2022**
 - Solved over 260 challenges in categories such as cryptography, reverse engineering, and binary exploitation
 - 3rd/7794 globally; 2nd/340 nationally (Canada); 8200 Individual Points

OPEN SOURCE PROJECTS

- **ESPWoL** Designed and implemented ESPWoL, a hardware Wake-on-LAN solution, managing the full development lifecycle from concept to deployment. Raised over \$56k on Kickstarter.
- **QOA: the Quite Okay Attendance system** Open source attendance system inspired by APlus+ attendance.
- **Flipper Meshtastic SX1262** LoRa software for long-range peer-to-peer communication on Flipper Zero.
- **SynologyMerge** Streamlines Synology NAS package management; over 50 stars on GitHub.
- **Donna** Customizable conference registration system for the World Affairs Conference.
